MEMORANDUM

To: Board of Supervisors
From: B. Frank Sakuma, Jr. CDM, District Manager
Date: August 27, 2025
Board Meeting Date: September 3, 2025

SUBJECT: Recommendation for Approval of OpenGov Enterprise Asset Management Application Contract

STAFF RECOMMENDATION

Staff recommends the Board's approval of a contract with OpenGov for the provision and implementation of the District Enterprise Asset Management Application.

GENERAL INFORMATION

Since May 2025, Special District Services, Inc. has conducted a comprehensive evaluation of software solutions to enhance operational efficiency in asset management and work orders through a cloud-based platform. Following this thorough review, staff has identified the OpenGov platform as a robust and complete solution that meets the District's current and future needs. This modern workflow automation platform, with a strong presence in the public sector, can be rapidly deployed to streamline our operations.

Our evaluation pinpointed several critical challenges with our current processes that the OpenGov platform will resolve:

- **Inefficient Manual Processes and Lack of Historical Data:** We currently rely on cumbersome Excel spreadsheets to track assets. This method makes it difficult to access and analyze historical data on maintenance, costs, and the condition of our assets.
- **Over-reliance on Institutional Knowledge:** A significant portion of our operational knowledge is not formally documented and resides with key staff members. This presents a substantial risk to the continuity of our operations as staff members transition or retire.
- **Reactive Maintenance Costs:** Our current system does not support proactive maintenance planning. Consequently, issues are often discovered only after a failure has occurred, leading to expensive and time-consuming emergency repairs. These critical failures happen approximately once a year and result in costs exceeding six figures.
- **Burdensome FEMA Reimbursement Process:** The manual compilation of documentation for Federal Emergency Management Agency (FEMA) reimbursement claims is a laborious and time-intensive process, frequently taking several weeks to complete.

Southern Grove Community District Nos. 1-10

MEMORANDUM

The implementation of the OpenGov platform will empower the Southern Grove Community Development Districts with the following key functionalities:

- **Centralized Asset and Work Management:** Consolidate assets, inventory, and work management into a single, integrated solution.
- **Automated Preventative Maintenance:** Schedule and automate preventative maintenance cycles for critical infrastructure, including stormwater and irrigation systems, to extend their lifespan and reduce costly failures.
- **Interactive GIS Integration:** Utilize a bi-directional GIS integration to create a comprehensive and interactive map of all district assets.
- **Data-Driven Budgeting:** Develop comprehensive budgets based on accurate data on asset conditions, labor costs, and other key metrics.
- **Enhanced Reporting and Analytics:** Provide organizational leadership with robust reporting tools, including customizable charts, graphs, and dashboards, to improve decision-making.
- **Comprehensive Project Tracking:** Efficiently track, monitor, and manage both routine work tasks and larger capital projects.
- **Streamlined FEMA-Compliant Reporting:** Generate FEMA-compliant reports to simplify and expedite the disaster reimbursement claims process.

About OpenGov Enterprise Asset Management

OpenGov Enterprise Asset Management is a software platform specifically designed to help public sector organizations manage their physical assets more effectively. It provides essential tools for tracking, maintaining, and analyzing infrastructure assets such as roads, buildings, parks, and utilities.[6][10] The platform enables users to create detailed asset inventories, schedule and track maintenance activities, and prioritize repairs.[7] By integrating with GIS, it offers a spatial context to asset data, allowing for visualization and analysis of assets on maps. The ultimate goal is to improve the efficiency, reliability, and lifespan of our infrastructure assets while optimizing resource allocation and budgeting.
